For this project, you will meet with an individual who is in
the senior stages of his or her life. Through conversation,
learn about his or her past experiences, memories,
important moments in life, and any pearls of wisdom he or
she wishes to share. The direction of your conversation is
up to you – you don’t need to come in with a specific list of
interview questions, but you should have an idea about
what it is you’d like to learn.

After conducting your interview, write a narrative based on
your conversation. Whether this is the re-telling of a
particularly poignant moment, a collection of amusing
anecdotes, or a reflection on important life lessons, will depend on what you take away from the
interview. The goal is to write with sincerity, preserving the knowledge of an individual whose words
may otherwise have not been spoken. Do not simply repeat what was said, but consider what it meant
to you, and what it might mean to others.

Your narrative is DUE no later than ________________________
